

1st Annual Earth Day at Tanglewood Estates in North Easton, MA

DATELINE: EASTON, MASSACHUSETTS

Stonebridge Homes, Inc., local home builders and developers, and Easton Real Estate together hosted their 1st annual Earth Day at Tanglewood Estates in North Easton.

Setting a clear example for people and businesses how simple lifestyle changes can make a difference, volunteers took away one-and-a-half truckloads of trash bags, five old tires, three propane tanks, a muffler, paper products from the woods surrounding the neighborhood and cleaned up across the street near the entrance to Route 106. Tanglewood Earth Day was considered a big success by everyone doing their part to keep the Earth green.

Additional highlights of the day included the local children getting involved and making Earth Day posters. This impressive artwork is now on display at the Easton Real Estate office. Earth Day gave the residents of Tanglewood Estate a chance to meet for the first time and to build personal friendships and a community.

Tanglewood Estates in North Easton is an ideal neighborhood for growing families looking for a mix of luxury and comfort. There are 80 single family homes ranging from \$900,000 to \$1,500,000. Each home offers a generous design and a variety of floor plan options, quality name brand products and materials. Many luxurious features include: Jacuzzi tub, master suite fireplace, walk-in pantry, granite countertops, central air conditioning and much more. Several upgrades are offered to customize to an individuals specific taste.

About Stonebridge Homebuilders

For more than 20 years, Stonebridge Homes and its team, now based in South Easton, Massachusetts, have built many residential communities throughout the northeastern United States. More recently, Stonebridge has been focusing on building in towns of southeastern Massachusetts, including Abington, Easton, Raynham, Taunton, Franklin, West Bridgewater, Pembroke, Whitman and Norwell. The styles of these communities have varied from imaginative condominiums to custom single-family homes designed by its award-winning in-house architect, whose specialty is customizing dream homes for individuals, couples and families. Each development is built with the same commitment to greener living quality and satisfaction.
